

F6® BATTLE WRAP

DYNAMIC CUT THROUGH RESISTANCE > 330 LBS. SELF EXTINGUISHING · IMPACT RESISTANT

With all the superior protection of its predecessor, Battle Braid®, F6® Battle Wrap offers the added feature of easy application due to the legendary F6® split tube, wrap-around design. F6® Battle Wrap is a heavy duty, cut resistant wrap-around sleeving designed to protect wire and cable assemblies from heavy impacts and punctures. Durable polyester construction absorbs and dissipates energy to offer superior crush and abrasion protection making F6® Battle Wrap an obvious choice for the automotive industry where brake lines and wire harnesses could be exposed to extreme environments. Because of its impact and crushproof makeup, this sleeving is also ideal for EV manufacturers when power cable protection is of utmost importance while giving easy identification for emergency crews in the case of a crash situation. Not only a great choice during assembly but, because of its F6® construction, it is also perfect for maintenance and repairs without the need to disassemble a harness.
