The global off-road and agriculture equipment market is changing rapidly due to infrastructure development, growth of emerging markets, and evolving environmental and safety requirements. Innovative technologies meant to improve operations, including advanced sensing, communication and control systems, and fuel-efficient engines, require superior performance from the wire, cable, and wire management products used in associated wire harnesses and components. IEWC carries a full line of products that can satisfy these specific performance requirements and withstand extreme conditions in off-road and agriculture equipment applications.

More than just your supplier, IEWC is part of *Your Team!*

For over 50 years, IEWC has worked *with* our customers to offer complete solutions for their wire, cable and wire management needs. With local expertise and a global network of distribution centers, IEWC provides the personalized service and support you need to get the job done right. Discover the difference it makes when IEWC is on “Your Team”.
