Incorporating audio and video has become critical for delivering a winning customer experience and enabling efficient collaboration for colleagues. Modern stores, hotels, hospitals, banks, and even common offices look little like those of yesteryear due to the proliferation of these tools and the capabilities they provide. IEWC has quickly become the reliable source for the foundation of these AV systems. From the cables feeding content to displays through the entire connected network centralized and powered in the equipment rack, IEWC is your source for the backbone that delivers the winning experience.

More than just your supplier, IEWC is part of *Your Team!*

Technology integrators designing and installing this crucial infrastructure are also faced with many common business challenges, including optimizing bidding, managing cash-flow, staffing appropriately, incorporating new technologies, and mitigating supply chain issues. For more than 50 years, IEWC has helped alleviate many of these challenges by working as a part of "Your Team." With local expertise, payment terms, hundreds of supply sources, competitive prices, and a global network of distribution centers, IEWC provides the personalized service and support you need to complete the project on time, every time. Discover the difference it makes when IEWC is on "Your Team."
